

B-55 COMPRESSED GAS

- CFC AND HCFC FREE
- 100% NON FLAMMABLE
- SAFE FOR ALL MATERIALS
- 100% ACTIVE PRODUCT
- DOES NOT LEAVE ANY CONDENSATION
- EXTREMELY PURE GAS
- OZONE SAFE
- EXTREMELY PURE HFC-134a

Net content: ml.400 / gr.482

Packaging: Aerosol

Applications:

Advanced design aerosol of a dry gas which acts like compressed air. Used for quick removal of dust, dirt and humidity from delicate and inaccessible areas (thanks to the thin-cane). Suitable when solvents can not be used, B-55 does not leave any residue nor condensation, being **extremely pure**. It doesn't affect any kind of material and, because of its characteristic of **non-flammability**, can be applied on live electrical equipments. Excellent for cleaning magnesium fluoride anti reflex coating of optical glasses, lenses and CCD cells. Ideal if periodically employed in eliminating humidity and dust that always are in the computer's cabinets and often cause damages to the hardware. Use only in upright position. OZONE SAFE.

Technical characteristics:

Inflammability:	100% non flammable
Flow rate:	25 g/10 sec.
Relative density:	1,21 kg/l at 25°C
Vapour tension:	666,1 kPa at 25°C
Colour :	transparent and colourless
Boiling point:	-26,5°C (1atm)
Cooling point:	-103°C
