

L-15 ISOPROPYL ALCOHOL

- CFC AND HCFC FREE
- COMPLETE EVAPORATION
- SAFE FOR MOST PLASTICS
- DOESN'T LEAVE ANY RESIDUE
- FILLED WITH NON FLAMMABLE GAS
- OZONE SAFE

Net Content: ml.400

Packaging: Aerosol

Applications:

An effective detergent for the all structures and plastic-housings of computers, printers, screens, plotter and photocopier drums and any other office machine. It completely evaporates, leaving no residue: it's particularly suitable for cleaning glasses, lenses and optical fibers and instruments. L-15 eliminates electrostatic build-up from audio and video heads, improving the efficiency of audio and video readers. Can be used, with good result, for cleaning optical readers of CD and DVD, PC-boards, electromechanical tuners, delicate audio and VCR components, glassed reading surfaces of photocopiers and scanners. Electric and electronic components can be washed with L-15, thanks to its good degreasing properties. Maintenance cleaner for reflow ovens. Good solvent that eliminates flux residues from PC-boards (in this case it's suggested the use of a bristle). Do not use on live circuits or near any source of ignition.

Technical characteristics :

Aspect:	transparent liquid
Odour:	characteristic
Boiling point:	82°C
Flash point:	13°C
Self ignition:	425°C
Density:	0,785 g/cm ³ at 20°C
